

THE UNIVERSITY OF ARIZONA

**TECH LAUNCH
ARIZONA**

REPAIRING HEARTS, IMPROVING LIVES: Bringing the UA-Invented Beating Heart Graft to Market Lunch & Discussion

Speakers will include:

- **Jordan Lancaster, PhD**, Chief Scientific Officer and Co-founder of Avery Therapeutics, who received his doctorate in physiology from the UA
- **Steve Goldman, MD**, Chief Medical Officer and Avery Co-founder, and Professor of Medicine at the Sarver Heart Center
- **Jen Watson, PhD**, Avery Chief Operating Officer who earned her doctorate in biomedical engineering from the UA
- **Lisa Lin**, Tech Launch Arizona Licensing Manager for the College of Medicine

How do the results and inventions stemming from medical research make their way from the bench to the bedside?

Join Tech Launch Arizona as we talk with the Avery Therapeutics startup team: Jordan Lancaster, PhD, Steve Goldman, MD, and Jen Watson, PhD. Through careful planning and collaboration, they worked with TLA to take an invention developed at College of Medicine from the lab to the marketplace. The team will talk about their invention and experiences, and then field your questions about the research and technology, the company, and the launch of a UA startup.

Dr. Carol Gregorio, co-director of the Sarver Heart Center, will provide a brief introduction.

Come and have lunch, and bring your great questions for our speakers. There will be ample time for Q&A.

**October 19, 2017
Noon - 1:00 PM**

**Medical Research
Building, Room 102**

**This event is for UA faculty,
staff and students only.**

**Lunch will be provided for all
who RSVP in advance.**
