

# Cancer Prevention and Control (CPC) Seminar

***EPI 696B***

**Wednesday, February 14<sup>th</sup>**

**9:00 am**

**(Bagels and Coffee will be served)**

**UA Cancer Center – 2920**

***“Risk Assessment and Prevention among Diverse  
Populations of the US Affiliated Pacific”***

**Rachel Novotny, PhD**

Professor, Department of Human Nutrition, Food and Animal Sciences and  
Population Sciences in the Pacific Program (Cancer Epidemiology)  
University of Hawaii Cancer Center  
University of Hawaii at Mānoa

**Presentation Summary:** The US Affiliated Pacific region is composed of small remote islands with diverse understudied Asian and Pacific populations that have unique exposures and risks in a rapidly changing environment. Traditionally practiced behaviors include betel nut chewing, growing tubers and catching fish, while changing behaviors involve modern foods and an increasingly sedentary lifestyle with television and video. These remote lower resource environments generally lack monitoring and assessment systems. Work done in the region to monitor, evaluate and intervene on cancer related risks will be described, including several novel measures.

If you wish to view this presentation live or at a later time, you may access the video at <http://webcast.ahsc.arizona.edu>. Click on 'Centers of Excellence' then "Arizona Cancer Center." On that date click on live seminars or at a later time, scroll to the date desired.
